

Dear Sir,

I am one of the fifty-five thousand people affected by an unconstitutional law introduced by the ruling party in Poland. The law imposes a collective responsibility on retired officers of uniformed services. As a result of the violation of the Constitution of Poland and fundamental human rights, forty-two people have already passed away. Due to changes brought to the Polish justice system I have been deprived of fair chances to fight for my rights. As a citizen of the EU, I ask you to defend me against this crass discrimination perpetrated under the Law and Justice government.

Best regards,
